EDUCATION

Hunter College

Computer Science, B.A.

Relevant Coursework: Computer Architecture I, Software Analysis II, Calculus II

New York, NY

Expected 5/2021

SKILLS

Proficient in: C++, Python, HTML, CSS

Exposed to: Javascript, Django, Bootstrap, Flask, React, Ajax

TECHNICAL EXPERIENCE

Peloton

Software Engineer Intern

New York, NY

7/2019 - 8/2019

- This four week internship involved working in a group of six to create a web application that returned classes from our database that matched the song or artist a user would input
- A second component of this project was Spotify's API integration into our web application
- Worked on the frontend by connecting the backend endpoints using React and Ajax and styled the components based on designs provided to us by the project manager with JSX and CSS
- Used Trello to manage tickets between team members and focused on integrating the first component of the project's frontend which included a search bar with a dynamic Javascript table and styling with CSS

BlackRock

WiTNY Intern

New York, NY

1/2019 - 1/2019

- Three week internship involving meeting different departments at the company and learning about their day to day work life
- Conducted user and market research for a problem in the FinTech industry and focused on analyzing data from the research to draw conclusions on the given problem
- Used Adobe XD to create a visual prototype to a solution in a team of three

Haven Life

Software Engineer Intern

New York, NY

1/2018 - 1/2018

- This two-week winter internship through WiTNY- a women in technology program, focused on creating a UAT Status Health page for Haven Life to check server uptimes
- Web application was built with Django framework with Python for the backend
- I focused on frontend design by incorporating HTML, CSS, and Javascript to develop functional web pages with a backend component to present server information for this health insurance company

TECHNICAL INVOLVEMENT
